

ISMS (ISO27001) Certificate Support

A risk exists where there is an identifiable likelihood of an identified threat exploiting an identified vulnerability in relation to the confidentiality, availability or integrity of an asset, and where that compromise will have a quantifiable impact on the organization.

Malaysia's Communications and Multimedia Act 1998 is scheduled for an amendment between March and May 2020.

Penalty for breach of Malaysia's first comprehensive personal data protection legislation, the Personal Data Protection Act 2010 (PDPA), is set at (up to) RM 300,000 and/or imprisonment not exceeding 2 years.

According to a research conducted by Erasmus Research, 53% of respondents had 250 employees or fewer and 9% employed more than 10,000 staff.

CIA triad

Confidentiality - The property that information is not made available or disclosed to unauthorized individuals, entities or processes
Integrity - The property of safeguarding the accuracy and completeness of assets
Availability - The property of being accessible and usable upon demand by an authorized entity

What is ISO27001 – ISMS?

Information security management system (ISMS) can be defined as the processes used by management to organize and coordinate security activities like governance, risk management, continuous improvement, internal audit, record keeping, document management, compliance management, communications, and awareness training.

ISO 27001 certifications have grown by 20% from the previous year. - Survey conducted by ISO, 2017

The adoption of ISMS is a strategic decision for an organization. The establishment and implementation of an organization's information security management system is influenced by the organization's needs and objectives.

The standard covers all types of organizations (e.g. commercial, government agencies, non-profits), all sizes (from micro-businesses to huge multinationals), and all industries/segments (e.g. retail, banking, defense, healthcare, education and government).

How ISMS can help your business

- Ability to meet compliance requirements increased for 78% of certified organizations
- Number of security incidents decreased for 51.6% of certified organizations
- Down time of IT systems decreased for 47.3% of certified companies
- Ability to respond to tenders increased for 56% of certified organizations
- Relative competitive position increased for 62% of certified companies

What is a *CertiPak*?

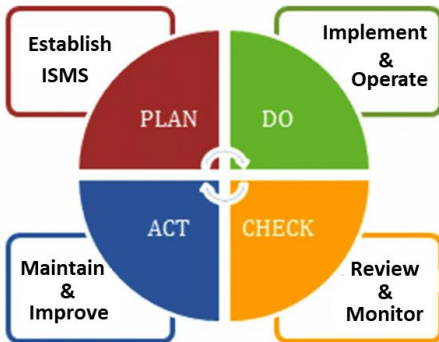

CertiPak is an online/remote ISMS consulting service, designed to have your company ready for ISMS certificate.

We developed this unique service, enabling you to implement an ISMS, developing documentation suitably scaled to the size of your organization.

CertiPak includes documentations, controls, and checklists needed for an effective ISMS and meet the requirements of the information security standard.

Benefits of a *CertiPak*

- Low-cost, affordable and saves money
- Tailored service for your company
- Easy to use
- Saves time: relieve burden from your staff
- Customizable to your company

Our team of experts have been providing information security services and solutions for over 20 years to organizations in highly regulated industries.

How our *CertiPak* works

We offer 2 types of ISMS certificate support to meet your company needs:

CertiPak DIY

<Do-It-Yourself Solution>

CertiPak DIY is a solution designed to put an Information Security Management System (ISMS) in place quickly and effectively and achieve certification to the ISO27001:2013 standard with much less effort than doing it all yourself.

The service includes the following:

- Guidance: Become your own expert, saving time and avoiding mistakes;
- Accurate: Documentation aligned with the Standard;
- Template: Pre-formatted templates designed for quick and easily embedded to your organization's documentation.

CertiPak EASY

<On-line Consulting Solution>

Online consultancy package designed to help small organizations to reach ISMS certification readiness with the support and assistance of professionals, evaluating, assessing and continuously improving the performance of your ISMS.

The service includes the following:

- Documentation: Risk assessment and governance documents;
- Training: Security awareness training for your staff;
- Support: Internal audit support;
- Management updates and review meetings.

We know that each organization is different; we can offer packages, tailored to meet your specific needs.
